

LINA JEPSEN

FRONTEND DEVELOPER
STUDENT

ABOUT ME

Meet a junior frontend developer who is enthusiastic about learning more about web development and coding.

When I'm not sitting in front of the computer, then you can probably find me petting my dog, working out at the gym or playing padel.

You can find more info about me and my education in my covering letter on the next side.

WORK EXPERIENCE

Internship - Frontend Developer

Sogeti (September 2022-December 2022)

The first internship of the education and I got to work on an internal project for the company. We worked in an agile manner and, among other things, we created wireframes, developed and held demos continuously throughout the period.

Sales co-worker

IKEA (2018-2022)

For 4 years, I have been a part of Ikea in Helsingborg where I have done everything from restocking items, participating in renovation planning, and acting as a salesperson in various departments. It has been a very educational period, and I have grown as a person at Ikea. I have learned, among other things, how to solve problems for our customers and to be a service-minded person.

Mail carrier

Bring Citymail (2014-2018)

Working as a mail carrier has given me experience in both being able to work independently and being able to work under certain time pressures without compromising on quality.

EDUCATION

EC Utbildning

Frontend developer (2021-2023) *ongoing*

Lunds universitet

Service Management Retail (2017-2019)

Lindsey Wilson College

English (2013)

Filbornaskolan

International social science and sports (2010-2013)

INTERESTS

Covering letter

My passion for web development dates to my childhood days, where I would spend countless hours on the computer, engaging in various activities such as playing games, creating and styling blogs, chatting with friends.

When I grew a little older, I started playing soccer and my world started to evolve around that instead. Hence why I flew over to America to play soccer and study in 2013. I stopped playing soccer in 2017, after playing it for 13 years. I really enjoy being a part of a team and I know how to work well together with others. 2017 is the same year I started to study Service Management in Lund University. I had a vision that I would work with service and a work opportunity came up at Ikea. I applied and got the job!

After studying and working at Ikea for a while I figure out that maybe it wasn't my call to only work with service and retail. I then started to think about what I wanted to do instead and that's when I thought about my younger self that loved to sit in front of the computer. I found the school "EC Utbildning" and did some tests but didn't get a place, because I didn't have a grade in "Programming 1" that was necessary for this education. Instead of giving it up I took my time to get a grade, learned the basics of C#, and applied again the year after and here I am today!

I have turned one of my young passions into a career and in June 2023 I will graduate after two years of education in frontend development.

Academic qualifications

Frontend Developer

- HTML5 & CSS3
- Javascript
- Avancerad Javascript med ReactJS
- UX teknik
- Backend i NodeJS
- Projekt Agilt SCRUM - Webbutveckling
